

COULSDON SIXTH FORM COLLEGE

BTEC Music (TECHNOLOGY) INTRODUCTORY DAY

On Music (BTEC) you will learn about creating, editing, mixing and producing music using digital software and audio hardware. You will use a range of equipment and be introduced to a variety of production techniques, creating your own recordings.

INDUCTION...

PRODUCTION TASK

Using the instruction sheets, use your midi keyboard and on-screen controls to recreate the theme from 'Halloween' in Logic

PRODUCTION TASK

WORK TO BE COMPLETED OVER THE SUMMER:

Using any software, prepare TWO songs to demonstrate your production skills. You will use these for your 'audition' at the start of your course in the Autumn term.

Your recordings should demonstrate your current skill level. Take a few screenshots of your software in operation and email them to yourself. Prepare a short verbal explanation of where your ideas came from and how you used the software to create your tracks, referring to the screenshots.

Make sure you have your screenshots and tracks exported to MP3 to show in September.

EXTENSION TASK...

Make a Youtube playlist of 3 or more videos explaining how Logic X and Reason 10 can be used to create tracks. Choose any style of music you like to demonstrate in these videos.

SEE YOU IN SEPTEMBER!
